

Dolphin Soft

Where
Creativity
Meets **Technology**

Mission

Dolphin Soft's mission is to bridge the physical and digital worlds. By leveraging advanced 3D content production technologies from 3D modeling and video to the development and design of 3D websites, extended reality (XR), and artificial intelligence we transform the way products and brands are presented, creating new and immersive digital experiences.

Our goal

We help businesses and brands develop the next generation of presentations and branding presentations that engage audiences and create lasting, impactful experiences.

Vision

Our aim is to make decision-making smarter, learning deeper, and interactions more tangible through innovative technologies. Additionally, by delivering engaging 3D experiences, we increase user engagement and push the boundaries of the digital world beyond what has been known so far.

A New Era in Branding and Advertising

Through unforgettable digital experiences, Dolphin Soft shapes one of the most significant visions of modern branding and advertising.

Industries That "**Trust**" Us

- Advertising Companies
- Interior Design & Furniture
- Jewelry Industry
- Gaming & Entertainment
- Online Exhibitions & Showrooms
- Tourism
- Luxury & Fashion Brands
- Factories & Production Lines
- Educational Industries
- Automotive & Industrial Parts
- Technology & AI Startups
- Construction & BIM Companies

3D Web Design

- 3D Configurators
- 3D Showrooms
- 3D Scroll Based Animations

3D Web Design

At Dolphin Soft, in addition to full website design and development, we specialize in creating and implementing 3D and interactive websites. This approach allows your products and services to be presented in a unique and distinctive way, ensuring your brand leaves a lasting impression on your audience.

Unique Features

- 3D animations and elements that create a unique and engaging experience for users when visiting your website.
- Enhancing brand luxury and creating differentiation in the presentation of products and services.
- Innovative web design for next-generation websites, ideal for brands that value innovation and exceptional user experience.

Digital Twin

Digital Twin

Digital Twin technology enables precise simulation of real environments, equipment, or systems in a digital space, allowing observation, control, and analysis before actual implementation.

Applications

Smart Monitoring & Management
Online supervision of projects, production lines, and urban infrastructures.

Fast and Optimal Decision Making
Scenario prediction and risk reduction before execution.

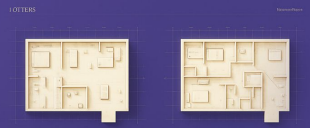

Increased Productivity
Simulation of changes and optimization of processes.

Interactive Experience
Direct interaction with environments and equipment in a digital space.

Projects

- Buildings & Architecture
- Factories & Production Lines
- Urban Management and Infrastructure
- Industrial Products & Complex Equipment

Realistic and interactive web-based renderings provide a tangible and engaging experience for clients, maximizing the visual impact of projects.

The ability to change and test different materials and view the results before and after implementation allows for fast and confident decision-making. By calculating space dimensions and selected materials, an accurate cost estimation is also provided.

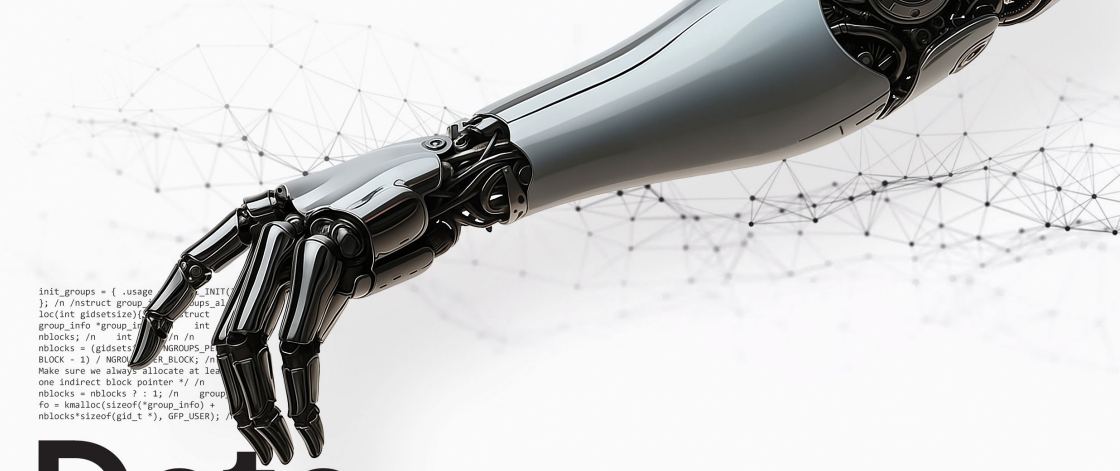

Interior design & architecture

With the 3D platforms we develop, designers, architects, suppliers, and end customers can precisely simulate both interior spaces and exterior facades.

- **AI & Machine Learning**
From predictive models to intelligent data analytics dashboards – we design tailored solutions for your business.
- **Interactive Dashboards & Charts**
With dynamic and customizable dashboards, make decisions faster and more accurately.
- **Data Visualization**
Display complex data in 2D, 3D, and interactive formats, and discover patterns and trends at a glance.

AI & Data

Transforming the Future of Your Business
In today's world, fast and accurate decision making is the key to success. By combining Artificial Intelligence, Machine Learning, and Data Visualization, we help you turn your most complex data into valuable insights.

AR Augmented Reality & VR

AR

View and interact with products in the user's real environment, enabling a better shopping and selection experience.

VR

Immersive VR experiences to showcase environments and products using VR headsets.

Virtual Showroom

An online 3D showroom that allows movement within the space, accessible via the web and compatible with VR headsets.

C Computer
G generated
I imagery

CGI & 3D Model

One of our core specialties is turning your creative ideas into unique brand advertisements. From precise modeling to producing captivating videos and posters, we manage projects from start to finish.

Our Team Workflow

1.Ideation & project review
2.Design & modeling
3. Development & execution
4.Testing & optimization
5. Delivery & support

CGI & Animation

Advertisements with cinematic effects and professional 3D models.

3D Modeling

Ready for rendering, websites, AR/VR, and simulations.

Rendered Images

Perfect for catalogs, marketing materials, and social media.
